

# KRISTIJAN MARKOVIC

## SUMMARY

Innovative Blockchain Developer known for high productivity and efficient task completion. Skilled in smart contract development, consensus algorithms, and cryptographic security. Excel at problem-solving, teamwork, and adaptability, ensuring successful project outcomes in fast-paced environments. Possess strong knowledge of Bitcoin, Ethereum and Hyperledger platforms. Known for ability to solve complex problems, create robust security architecture and build efficient decentralized applications (DApps). Previous work has led to improved system efficiency, increased security measures and optimized performance of blockchain systems.

## EXPERIENCE

**Blockchain Developer, 07/2023 - Current**  
**LLC and Article Agency - Zvecka, Serbia**

- Collaborated with stakeholders to create user-friendly interfaces for DApps.
- Maintained and updated existing blockchain networks on a regular basis.
- Participated in open source communities such as Hyperledger, Ethereum.
- Coded smart contracts in Solidity for decentralized apps.
- Researched new technologies related to blockchain development for scalability purposes.
- Developed blockchain applications using Hyperledger Fabric, Ethereum, and Quorum.
- Implemented distributed ledgers with APIs to interact with other systems.
- Created dashboard and data visualizations to meet customer reporting needs.
- Performed security assessments and control matrix reviews to evaluate blockchain processes and risks.

## EDUCATION AND TRAINING

**Bachelor of Science, Computer Science, 09/2020**  
**University of Novi Sad - Novi Sad, Serbia**

## LANGUAGES

**English:**

Full Professional

**Chinese (Mandarin):**

Professional

## CONTACT

**Address:** Obrenovac, Serbia 11500

**Phone:** +381613168402

**Email:** kikidev314@gmail.com

## SKILLS

- Solidity
- Rust
- FunC
- Web3.js
- Python
- TypeScript
- Node.js
- React.js
- Next.js
- Cryptocurrency
